Disclaimer Statement

The goals of the TaxWorks data conversion are as follows:

1. To convert only the ProSeries data (to TaxWorks format) that you will need to run the Update Clients, this transfers your 2004 TaxWorks data to 2005 TaxWorks.
2. To convert only the 2004 ProSeries data (to 2004 TaxWorks format) that will allow you to generate **complete** and accurate Tax Organizers.

The data conversion is NOT intended to do the following:

1. It is NOT intended to convert all of your data
2. It is NOT intended to allow you to generate a complete and accurate 2004 TaxWorks tax return!

Note: Do not process/prepare 2004 tax returns using only the converted information, as tax calculations may not be accurate. Some manual data entry may be required.

Asset Manager Conversions (All Systems)

- ✎ We recommend you print a copy of the TaxWorks Federal Depreciation Schedule and verify that the TaxWorks current depreciation amounts match those calculated by your prior software. Due to the many ways depreciation can be calculated, there may be slight differences that could require manual overrides in the TaxWorks Asset Manager.
- ✎ If you have overridden any depreciation calculations, please review them for accuracy.
- ✎ If you used 200% declining balance on any farm asset, you will need to override the current depreciation.
- ✎ If you had selected to delete the asset next year, the asset will not convert.
- ✎ Any asset carrying to Sch A points will be depreciated over the life of the asset using the Straight Line Method.
- ✎ Assets involved in a like-kind exchange may not convert properly, because of the difference in handling between the two systems. Please review them carefully to make sure the correct information is entered into the TaxWorks Asset Manager.

- Due to the limited amount of information being converted, if you have current year Section 179, the conversion may calculate a carryforward of these amounts. To remove the unused carryforward, open the TaxWorks 2004 Asset Manager, click the 179 button, and remove any unnecessary information.
